

TA'NARA N. TAYLOR

Clearance Level: TS/SCI CIP

240.383.8565 | tanara.taylor@yahoo.com | [linkedin.com/in/taylortanara](https://www.linkedin.com/in/taylortanara)

Information System Security Officer (ISSO) with experience supporting RMF lifecycle activities, continuous monitoring, and security compliance in classified environments. Skilled in managing vulnerability remediation, maintaining RMF artifacts (SSP, POA&M), and supporting ATO processes. Experienced in conducting SCAP scans, analyzing ACAS findings, and coordinating with cross-functional teams to ensure systems meet DISA STIG and security control requirements. Known for ensuring systems remain secure, compliant, and audit-ready in high-security environments.

PROFESSIONAL EXPERIENCE

Accenture Federal Services | Office of Naval Intelligence

CLOUD ENGINEER - CUSTOM SOFTWARE ENGINEERING SPECIALIST

Sept. 2024 - Feb 2026

Suitland, MD

- Supported security compliance efforts by reviewing vulnerability scan results and validating remediation actions in alignment with RMF and DISA STIG requirements
- Contributed to continuous monitoring by tracking vulnerability status, documenting remediation progress, and supporting audit readiness activities
- Assisted in maintaining secure system configurations across Linux and AWS-hosted environments
- Collaborated with system administrators and security teams to ensure systems remained compliant with security controls
- Troubleshoot system issues and supported secure access to maintain operational continuity

CLOUD ENGINEER - INFRA TRANSFORMATION SPECIALIST

Jan 2024 – Sept 2024

- Deployed, managed, and optimized cloud-based systems and applications in AWS, ensuring secure and efficient data storage and system performance.
- Configured and maintained cloud infrastructure, including networking and security services, adhering to industry best practices.
- Performed regular system maintenance on Windows and Linux instances, ensuring system integrity and security.
- Developed cloud-based applications and databases with a focus on high performance and scalability.
- Monitored and optimized cloud services, troubleshooting and making necessary adjustments to enhance efficiency.
- Collaborated with vendors to manage costs, scalability, and performance, ensuring systems meet business and budget requirements.
- Designed and implemented secure network solutions to meet business and security needs.
- Automated AWS services using scripting languages such as Python and Perl, reducing manual intervention and increasing operational efficiency.
- Deployed cloud applications using EC2 and Elastic Beanstalk, ensuring uptime and scalability.
- Developed and tested disaster recovery plans to ensure system resilience and recovery capabilities.
- Performed infrastructure upgrades, minimizing downtime while optimizing system efficiency.
- Built tools for monitoring, deploying, and troubleshooting AWS resources to maintain seamless cloud operations.
- Developed software components using Java, Python, and .NET, integrating AWS APIs to enhance functionality.

CLOUD ENGINEER - DATABASE SYSTEM ADMINISTARTOR

Sept 2023 – Dec 2023

- Designed, deployed, and maintained cloud-based systems in AWS, ensuring secure and efficient data storage.
- Configured cloud infrastructure components like networking and security services.
- Performed weekly updates on Windows and Linux instances in AWS.
- Created cloud-based applications and databases, ensuring high performance.
- Monitored cloud systems and data storage services for optimal operations.
- Negotiated with vendors to manage costs and ensure scalability.
- Designed and implemented secure network solutions to meet business needs.
- Deployed applications using AWS services such as EC2 and Elastic Beanstalk.
- Developed and tested disaster recovery plans to ensure system reliability.
- Automated AWS services using scripting languages like Linux.
- Built tools for deploying, monitoring, and troubleshooting AWS resources.

Tunuva Technologies, Inc. | Parsons Corporation | National Reconnaissance Office | Aerospace Data Facility- East

PROGRAM INFORMATION SYSTEM SECURITY OFFICER LEVEL III

2022 - 2023

Fort Belvoir, VA

- Supported RMF lifecycle activities including control validation, continuous monitoring, and ATO readiness
- Maintained and updated RMF artifacts including System Security Plans (SSP), POA&Ms, and supporting documentation
- Conducted SCAP scans and vulnerability assessments using ACAS to identify and track security findings
- Analyzed vulnerabilities and coordinated remediation efforts with system administrators and stakeholders
- Performed weekly CVE reviews and validated patch compliance against security requirements
- Supported audit readiness and security assessments by ensuring systems met DISA STIG and RMF control standards
- Assisted in risk identification, documentation, and mitigation planning across classified systems
- Ensure all systems users have proper security clearance, authorizations and need-to-know before allowing access.
- Supported ATO processes by assisting in the preparation, review, and maintenance of security authorization documentation.

EDUCATION

December 2021

BACHELOR OF SCIENCE, INFORMATION TECHNOLOGY | CYBER SECURITY
Strayer University, Camp Springs, MD

LICENSES & CERTIFICATIONS

- AWS Solutions Architect – Associates - 2024
- ServiceNOW Certified System Administrator - 2025
- Risk Management Framework – 2022
- AWS Cloud Practitioner - Foundational – 2024
- Red Hat Enterprise Linux – *In Progress*
- Security + CE License - 2021

TECHNICAL SKILLS & SOFTWARE PROFICIENCIES

- ServiceNOW, JIRA & Confluence
- RMF Lifecycle Support (Categorize, Select, Implement, Assess, Authorize, Monitor)
- Amazon Web Services
- Continuous Monitoring
- Complex Problem-Solving
- DISA STIG Compliance
