Information Systems Security Officer with 3+ years of experience supporting classified DoD systems through Risk Management Framework (RMF) implementation, vulnerability management, and ATO sustainment. Proven expertise in managing SSPs, POA&Ms, ACAS/Nessus remediation, STIG/SCAP compliance, and continuous monitoring in JWICS and air-gapped environments. Trusted security partner to ISSMs, engineers, and system owners in maintaining operational security posture and regulatory compliance.

PROFESSIONAL EXPERIENCE

Program Information System Security Officer (ISSO) – Level III

Tunuva Technologies | Parsons | National Reconnaissance Office

2022 – 2023

- Supported ISSM in maintaining operational security posture for classified intelligence systems.
- Managed and updated System Security Plans (SSPs), POA&Ms, and RMF artifacts to maintain ATO readiness.
- Enforced NIST 800-53 security controls and validated compliance through continuous monitoring processes.
- Conducted ACAS/Nessus and SCAP vulnerability scans; tracked remediation aligned with STIG and CIS benchmarks.
- Coordinated with system owners and engineering teams to resolve high-risk findings within SLA.
- Uploaded scan results and logs into Splunk for centralized monitoring and anomaly detection.
- Maintained configuration management baselines affecting system security and audit posture.
- Administered privileged access controls and ensured least-privilege enforcement.
- Supported security control assessments (SCA) and prepared evidence packages for authorization reviews.

CLOUD ENGINEER / TECH ARCHITECTURE SPECIALIST

Accenture Federal Services | Office of Naval Intelligence | NMIC

Dec 2025 – Feb 2026

- Architect and maintain secure AWS and RHEL-based systems supporting classified DoD mission operations.
- Drive vulnerability remediation lifecycle by validating ACAS findings and coordinating corrective actions.
- Apply STIG/SCAP hardening to Linux systems to maintain compliance with DoD security standards.
- Produce remediation evidence and documentation supporting continuous monitoring and RMF reporting.
- Collaborate with cyber and infrastructure teams to sustain ATO and reduce risk exposure.
- Support configuration management and change control processes impacting system security posture.

CLOUD ENGINEER / CUSTOM SOFTWARE ENGINEERING SPECIALIST

Accenture Federal Services

Sept 2023 – Dec 2025

- Managed patching and compliance using Red Hat Satellite and Ansible Automation Platform in air-gapped environments.
- Upgraded Ansible Tower to AAP 2.4.9 in JWICS production environment, ensuring secure integration.
- Automated vulnerability tracking and patch compliance processes to reduce remediation timelines.
- Supported secure AWS infrastructure deployments aligned with RMF and STIG requirements.
- Assisted in continuous monitoring reporting and audit documentation preparation.

Cloud Engineer / Infrastructure Transformation Specialist

Accenture Federal Services

Jan 2024 – Sept 2024

- Implemented secure AWS environments (EC2, IAM, SSM) with enforced encryption and access controls.
- Automated patching and system hardening workflows to improve compliance posture.
- Integrated monitoring and logging solutions to enhance visibility and security event detection.
- Supported system recovery readiness and resilience planning in classified environments.

 240.383.8565 |  tanara.taylor@yahoo.com |  [linkedin.com/in/taylortanara](https://www.linkedin.com/in/taylortanara)

EDUCATION

Bachelor of Science – Information Technology (Cyber Security)

Strayer University – Camp Springs, MD

Associate of Arts – Foundations of Business

University of Phoenix – Tempe, AZ

CERTIFICATIONS

- Security+ CE (DoD 8570 IAT Level II Compliant)
- Risk Management Framework (RMF)
- ServiceNow Certified System Administrator (CSA)
- AWS Solutions Architect – Associate
- AWS Cloud Practitioner
- Red Hat Certified System Administrator (In Progress)

TECHNICAL SKILLS

Frameworks & Compliance:

RMF, NIST 800-53, ATO Lifecycle, Continuous Monitoring, STIG/SCAP Hardening, Configuration Management

Security & Monitoring Tools:

ACAS / Nessus, Splunk, ServiceNow, JIRA, Trellic ePO

Infrastructure & Platforms:

RHEL 8/9, AWS (EC2, IAM, SSM), Red Hat Satellite, Ansible Automation Platform

Security Functions:

Vulnerability Management, Security Control Enforcement, Access Control Administration, Risk Assessments, Audit Readiness Documentation
