SUMMARY

Systems Administrator and IT operations professional with experience supporting secure Linux and cloud-based environments in regulated and mission-focused settings. Skilled in system maintenance, patching, STIG compliance, vulnerability remediation, access management, troubleshooting, backup support, and operational documentation. Experienced in supporting AWS-hosted infrastructure and Linux-based systems within secure environments. Known for maintaining secure, stable, and compliant systems in high-security environments.

EXPERIENCE

Cloud Engineer | Accenture Federal Services

09/2023 to 02/2026

- Supported secure operation and maintenance of AWS-hosted and Red Hat-based systems in mission-critical environments
- Performed system patching, troubleshooting, and performance support to maintain availability and compliance
- Reviewed ACAS findings, supported remediation efforts, and helped validate vulnerability fixes across Linux-based systems
- Conducted SCAP scans and assisted with DISA STIG hardening to support RMF compliance objectives
- Documented remediation activities and vulnerability status updates for continuous monitoring and audit readiness
- Collaborated with infrastructure and cybersecurity teams to maintain secure, stable, and compliant environments

Tech Architecture Specialist | Office of Naval Intelligence

11/2022 to 08/2023

- Optimized control validation processes for Risk Management Framework, utilizing Nessus and Assured Compliance Assessment Solution to significantly improve accuracy and streamline monitoring
- Detected 50 critical security gaps via targeted vulnerability assessments using Nessus, driving security improvement initiatives across the organization
- Implemented thorough vulnerability assessments with Nessus, exposing critical vulnerabilities and resulting in a markedly improved security posture for the organization
- Coordinated vulnerability remediation efforts across system stakeholders
- Performed weekly CVE reviews and patch validation to maintain compliance
- Strengthened classified system security by executing assessment and authorization processes, leveraging Nessus and the Assured Compliance Assessment Solution

Program Information Security Officer | NMIC

05/2022 to 10/2022

- Performed system installations, upgrades, troubleshooting, and maintenance for supported hardware and software environments
- Resolved service tickets and user issues while meeting operational response expectations
- Supported end users by providing technical assistance and guidance on system access and usage

EDUCATION

Bachelor of Science, Information Technology (Cyber Security) | Strayer University

2021 to Present

Studied Information Technology with a focus on Cyber Security. Gained knowledge in system engineering, operating system software, and Microsoft Windows Server.

Associates of Arts, Business | University of Phoenix

2021 to Present

Completed an Associates of Arts in Business, providing a foundation in business principles and practices.
